

## HEPA FILTERED NEGATIVE PRESSURE WORK ENCLOSURE **Q-N-AIR II**

### **Features:**

The Q-N-Air II work enclosure, made of an auto-extinguishable vinyl material, is mounted on a mobile and rigid aluminum platform, and is equipped with its own HEPA fan filter unit, allowing you to transform a wall or ceiling work application into a negative pressure work zone. This will protect the work environment from any nuisance dust. Entirely washable with a floor drain, the enclosure sits on 4 - 6" industrial wheels, which all 4 have breaks.

### **New features;**

**Four 8" x 8" access panels allow the introduction of tools, wires or pipes;**  
**Four heavy duty rapid action ratchet raising poles;**

### **Electricity:**

6' hospital grade power cord.

### **Filtration:**

HEPA fan-filter unit: 155 cfm, 46 dBA.

### **Dimensions:**

Standard dimensions: 28" x 60" x 114" high.
